Handle a 6 Events team and
Maintain Event Website

EXPERIENCE

MCS | Front End Developer

May 2025 – Present | Bangalore, IND (Remote)

- Built responsive web application with 15+ theme variants using Bootstrap 5 and PHP, serving Admin, Member, and Affiliate user roles with dynamic theme switching.
- Developed complex genealogy trees and network visualization components using JavaScript for real-time member hierarchy and commission tracking dashboards.
- Optimized frontend performance by consolidating 20+ JavaScript libraries, implementing lazy loading, and creating reusable UI components reducing code duplication by 60%.

NIT-T | (AID VISION) Web Developer & Software Dev Intern

May 2024 - June 2024 | NIT, Trichy, TN (On-site)

- Led the development of Aid Vision at **NIT Trichy**, using **HTML, CSS, JavaScript, Bootstrap, React, and TensorFlow** to build a web application with features like image annotation and counting for a startup company.
- Implemented a preloaded **Tensorflow** model, optimizing it for real-time **image analysis**, ensuring seamless functionality and high performance.
- Managed a **3-member team**, coordinating development efforts, task assignments, and ensuring the successful delivery of project milestones

VARIT 2K25 | Head, Web Developer

Dec 2024 – Feb 2025 | Jamal Mohamed college, Trichy, TN (On-site)

- Led a 5-member team as **Team Leader** for Varit2k24 Symposium.
- Implemented HTML, CSS, JavaScript, jQuery, Bootstrap, and animation for a dynamic user experience.
- Achieved over **1,000+** participants registered by creating an engaging platform for registered students details.

PRODIGY | Web Dev Intern

May 2024 - June 2024 | Mumbai, IND (Remote)

- Developed front-end components and interfaces for **five company** projects using HTML CSS JS **React** Bootstrap and other main resources.
- Implemented responsive designs and ensured cross-browser compatibility for improved user experience and Our teams deliver high-quality front-end solutions.

PROJECTS

VARIT 2K25 | Head, Web Developer [Link](#)

- **Led the complete web development team for Varit 2k25 Symposium**, managing design, frontend, and deployment of the official event website with modern technologies (HTML, CSS, JavaScript, Bootstrap, animations).
- **Designed and developed a scalable registration platform** that handled **1000+ participant registrations** seamlessly with responsive UI and real-time updates.
- **Enhanced user experience** by integrating interactive features such as event schedules, live updates, and smooth navigation, resulting in a **30% increase in engagement** compared to the previous edition.
- **Collaborated with a 6-member cross-functional team**, ensuring timely delivery of website modules, bug fixes, and optimizations, while maintaining high performance and mobile compatibility.

VASANTHAM REALTY | Freelance, Real Estate E com [Link](#)

- Developed and maintained a comprehensive real estate web platform using **PHP**, **handling property listings**, user authentication, and admin management features.
- Implemented secure **user and agent login systems**, password reset functionality, and robust session management to enhance application security.
- Built dynamic modules for property **search**, **city-wise and type-wise property details**, and integrated enquiry management for improved user engagement.
- Collaborated on admin **dashboard features**, including banner management, blog publishing, and data reporting, streamlining backend operations and content updates.

THE EXPERT HUB | Website for Digital Agency [Link](#)

- **Developed a fully responsive, multi-section website** (Home, Services, Projects, Contact) ensuring seamless accessibility across devices.
- **Implemented modern UI/UX practices** with clean layouts, engaging visuals, and intuitive navigation to improve user experience.
- **Built scalable, modular frontend components** (hero sections, service cards, testimonials) for easy updates and maintainability.
- **Optimized website performance** by refining code structure and visuals, ensuring faster load times and smooth user interactions.

NME PORTAL | Website for Students, Jamal Mohamed College [Link](#)

- Developed and deployed a Student Secondary Department Selection Portal using HTML, CSS, JavaScript, PHP, and MySQL, supporting **6,000+ students**.
- Implemented a secure login system **with role-based authentication**, ensuring real-time department selection and preventing conflicts.
- **Designed and developed a secure admin panel** using PHP & MySQL to manage student details, department records, and seat allocation.
- **Built a role-based login system** ensuring data privacy and controlled access for administrators.
- **Implemented dynamic CRUD operations** (add, edit, update, delete) for departments and student data with real-time database connectivity.
- **Created an interactive, responsive dashboard** with sidebar navigation and modern UI styling for ease of use and better accessibility.

RIGHT ALLY | US Realtors commission based AI Software [Link](#)

- Developed responsive **MLM platform** using **Bootstrap 4/5 framework** with custom SCSS stylesheets, implementing mobile-first design patterns and cross-browser compatibility for complex dashboard interfaces
- Built interactive frontend components using jQuery 3.x, **JavaScript ES6+**, integrating libraries like Select2 for enhanced dropdowns, DataTables for dynamic data grids, and **ApexCharts** for real-time dashboard visualizations
- Implemented rich user experience features using Owl Carousel for content sliders, Magnific Popup for modal galleries, **Campaign and workflow** Bootstrap **DatePicker** for form controls, and jQuery Sparkline for micro-charts in member dashboards
- Developed WebSocket-based real-time chat interface using JavaScript and **Codeigniter**, implemented live notifications, and created dynamic tree visualization components for genealogy networks and member hierarchies

FOCUS LOGIC | Website for South African Client commission based E-commerce [Link](#)

- Developed enterprise e-commerce and **MLM platforms** using **Codeigniter** jQuery 3.2.1, **Bootstrap 3.3.7/4.x frameworks**, implementing responsive CSS3 designs with **FontAwesome** icons and custom SCSS stylesheets for multi-device compatibility
- Integrated comprehensive frontend stack including CKEditor for rich text editing, Bootstrap DatePicker for form controls, SweetAlert for notifications, **Ajax Pagination**, and Tooltip-Alert systems for enhanced user interaction
- Built dynamic user interfaces using JavaScript ES6+, jQuery, implementing interactive features like Ajax-powered pagination, Bootstrap Tag Input, Slick Carousel, Select2 dropdowns, and Nestable drag-drop interfaces for complex data management
- Managed comprehensive asset pipeline with vendor.js bundles, minified CSS/JS files, implemented CDN fallback strategies, and optimized frontend performance using **Modernizr**, **Popper.js**, and modular JavaScript architecture for scalable web applications

DELT VITA | Website for US Client commission based E-commerce [Link](#)

- **Built a responsive wellness e-commerce platform** with intuitive category navigation—spanning sections like “Beauty & Timeless,” “Immune Protection,” “Premium Coffee,” and “Metabolism Support.”
- **Developed a fully responsive wellness storefront** with clearly organized product categories like "Balanced & Core Support," "Immune Protection," and "Premium Coffee" for intuitive browsing.
- **Integrated multi-currency, affiliate, and membership features**, including EUR/AED/GBP/USD options and login flows like “Store Login,” “Affiliate Login,” and “Become a Member.”
- **Enhanced product discovery and engagement** through rich UI elements—such as featured “Smart Start Partner” promotions, curated product lists (e.g., “Energy Strips,” “Multivitamin Bear Gummies”), and clean cart/checkout indicators.
- **Ensured coherent brand and user experience**, unifying header navigation (Home, Shop, Training, Who We Are, Contact) and functional elements (search, cart icon, membership access) across the storefront.
